### HOW WE MEASURE

**Enrollments.** Participants on the cohort roster, each counted once.

**Completion rate.** Share of participants in finished cohorts who attended at least 80% of planned sessions. Cohorts still running are counted once they finish.

**Certificates.** Issued to participants who complete the program and score at least 70% on the post-assessment.

**Skills gained.** Change in average score on the same 10-question assessment taken at the first and last session, for participants who took both. Shown in percentage points.

**Job placements.** Graduates who report a new job or role that started after they joined (employed full-time, employed part-time, internship or apprenticeship or self-employed or freelance) in self-reported surveys 30, 60 and 90 days after the last session. Rate is out of graduates surveyed so far.
